In the BDCP biweekly call this morning, Ryan Wulff gave us a heads up that NMFS will reach out to EPA this week to set up a meeting for next week to go over next steps and their plans with a supplemental. The principles are in meetings today to discuss many issues, one of them being the larger suite of issues for the supplemental. The main issues being discussed at the principles meetings, however, are the Section 7 consultation issues and project scope.

Ryan did say very definitively, yes there will be a supplemental and yes, it will be announced by Aug 27<sup>th</sup>. But that the details would be worked out next week in the meeting with EPA.
